

STEP 1:

Use the **screws** to adjust the angle of your lighting. Once you've found your preferred angle, tighten both screws to lock your Video Conference Light into place.

Screw (A) Adjusts your light forward/backwards.

Screw (B) Adjusts your light left/right.

STEP 2:

Flip up the suction cup **lever** to unlock the suction.

STEP 3:

Suction mount must be on a smooth, flat surface.

Clean off where you'd like to mount your light, and then press down and hold firmly while activating suction lever.
